

CLEAN ROOM MEMORANDUM

Independent Development Declaration — K-Phi Platform

Document Reference	VDO-CR-2026-001
Date	22 May 2026
Author	Vincent Donnat, Owner — Vdonomics Consulting Kft
Subject	Declaration of independent development of the K-Phi software platform
Classification	CONFIDENTIAL — ATTORNEY-CLIENT / LITIGATION PRIVILEGE

1. PURPOSE

This memorandum establishes and documents the independent development of the K-Phi software platform ("K-Phi" or the "Platform"). It is prepared for the purpose of demonstrating that K-Phi was conceived, designed, developed, and deployed without the use of any proprietary code, data, trade secrets, or confidential information belonging to KYRIBA SEMEA ("Kyriba") or any other third party. This document may be used in connection with intellectual property due diligence, investor discussions, or legal proceedings.

2. DECLARANT AND ENTITIES

Vincent Donnat ("the Declarant") is the sole owner of Vdonomics Consulting Kft, a Hungarian limited liability company (Kft.) registered at Szent Istvan Park 4, 1137 Budapest, Hungary (VAT: HU28991733). Vdonomics Consulting Kft is the legal entity that developed K-Phi and holds all associated intellectual property rights, including EU trade mark application 019367882 ("K-phi", word mark, filed 20 May 2026, EUIPO).

The Declarant has been engaged by Kyriba as an independent contractor since March 2021 under a Contractor Memorandum dated 5 March 2021. This engagement is structured as a contract for services (Section 9.1 of the Kyriba Terms), not an employment relationship. The Declarant's assignment at Kyriba relates to Product Ownership of the FSI initiative and related TMS product activities.

3. PLATFORM OVERVIEW

K-Phi is a treasury intelligence and financial close platform targeting mid-market corporates. It enables users to import general ledger data, automatically build financial statements (Balance Sheet, P&L, Cash Flow Statement), compute KPIs, run forecasts, and manage the period-end close process. The platform is delivered as a web-based SaaS application.

4. DECLARATION OF INDEPENDENT DEVELOPMENT

The Declarant hereby affirms and declares that:

- **No Kyriba Code:** K-Phi does not contain, incorporate, or derive from any source code, object code, libraries, frameworks, or software components proprietary to Kyriba. Not a single line of Kyriba code has been copied, adapted, or reverse-engineered into K-Phi.
- **No Kyriba Data:** K-Phi was developed and tested using synthetic/demo data generated for testing purposes and publicly available financial data. No customer data, internal Kyriba

datasets, database schemas, or data models belonging to Kyriba were used at any stage of development.

- **No Kyriba Confidential Information:** The design, architecture, and feature set of K-Phi were conceived independently based on the Declarant's 25+ years of professional expertise in treasury and financial technology. Domain knowledge of treasury operations, financial reporting standards (IFRS/GAAP), and cash management practices constitutes professional expertise, not proprietary information of any employer or client.
- **No Kyriba Resources:** K-Phi was developed entirely on the Declarant's personal equipment, using personal accounts, personal internet connectivity, and infrastructure paid for by the Declarant or Vdonomics Consulting Kft. No Kyriba hardware, software licenses, cloud accounts, development environments, or office facilities were used.
- **No Kyriba Working Hours:** Development of K-Phi was conducted outside of hours worked for Kyriba. The Declarant maintained clear separation between Kyriba assignment work and K-Phi development activities.
- **Kyriba API Integration is Public:** K-Phi includes an optional export feature that connects to Kyriba's publicly documented REST API (api.demo.kyriba.com). This integration uses Kyriba's public developer portal documentation, available to any third-party developer. It is a connectivity feature, not a derivation of Kyriba IP.

5. TECHNOLOGY STACK

K-Phi is built entirely on open-source technologies and publicly available libraries. The complete technology stack is as follows:

Component	Technology	License
Runtime	Node.js >= 18.0.0	MIT
Web Framework	Express.js 4.18	MIT
Database	sql.js (SQLite compiled to WASM)	MIT
Frontend	Vanilla JavaScript SPA (single-file)	Proprietary (Vdonomics)
Authentication	jsonwebtoken (JWT)	MIT
Password Hashing	bcryptjs	MIT / BSD
Email	Nodemailer	MIT
Image Processing	Sharp	Apache 2.0
Scheduling	node-cron	MIT
Charts (frontend)	D3.js, ApexCharts (CDN)	BSD / MIT
Testing	Jest, Supertest	MIT
Hosting	Render.com (cloud PaaS)	Commercial SaaS
Source Control	GitHub (personal account: vinzzzz2000)	Commercial SaaS
Domain	k-phi.com	Registered by Vdonomics
CI/CD	GitHub Actions	Commercial SaaS

No proprietary or closed-source third-party libraries are used. All dependencies are installable from the public npm registry.

6. CODEBASE PROVENANCE

Metric	Value
Repository	github.com/vinzzzz2000/lfs-engine (private)
First Commit	15 February 2026
Latest Commit	22 May 2026
Total Commits	1,846
Active Development Days	82 unique days
Main Application	index.html — 44,644 lines
Server	server.js — 7,225 lines
Total Codebase	~52,000 lines of code
Test Files	70 test files
Test Cases	1,276+ automated tests
Contributors	Vincent Donnat + Claude (AI coding assistant)

The complete Git history provides a timestamped, cryptographically linked chain of evidence showing the incremental development of every feature from initial commit to production deployment. An e-Soleau deposit of the source code has been filed with the French National Institute of Industrial Property (INPI) to establish independent proof of existence and authorship.

7. TECHNICAL DIFFERENTIATION FROM KYRIBA

Aspect	Kyriba	K-Phi
Target Market	Large enterprise (10k+ employees)	Mid-market (100-5,000 employees)
Architecture	Java / Oracle / monolithic	Node.js / SQLite / single-page app
Deployment	Multi-tenant cloud (AWS)	Per-tenant SQLite on Render.com
Frontend	Angular / proprietary UI framework	Vanilla JS, no framework
Database	Oracle / PostgreSQL	sql.js (SQLite in WASM)
AI Features	Limited (CashAI v1/v2)	Integrated copilot + Assisted Fix engine
Financial Close	Not a core feature	Core workflow with 6-phase pipeline
Code Size	Millions of lines (est.)	~52,000 lines
Pricing	Enterprise SaaS (\$100k+/yr)	Mid-market SaaS (target <\$20k/yr)

K-Phi and Kyriba share no code, no architecture, no database schema, and no deployment infrastructure. They operate in overlapping domains (treasury management) but with fundamentally different technical approaches, target markets, and product philosophies.

8. CONTRACTUAL ANALYSIS

The Contractor Memorandum between Kyriba SEMEA and Vdonomics Consulting Kft (dated 5 March 2021) contains the following relevant provisions:

Section 7.1 — Intellectual Property

This clause assigns to Kyriba all IP "arising out of or in the course of the Contractor's or any of the Staff's performance of the services during the Assignment." The scope is limited to work performed FOR Kyriba as part of the defined Assignment (Product Owner FSI). K-Phi was not developed as part of, or in connection with, the Kyriba assignment. The clause does not contain a "relates to the business" catch-all provision that would extend to independent activities in the same domain.

Section 9.1 — Contractor Status

The contract explicitly establishes the relationship as that of an independent contractor, not an employee. Under French law (which governs this contract per Section 11.1), the default rule for independent contractors is that they retain IP rights over their own work unless explicitly assigned. The assignment clause in 7.1 is explicit but narrow in scope — it covers assignment work only.

Section 7.3 — Confidentiality

The confidentiality obligations prohibit the use or disclosure of Kyriba's trade secrets and confidential information. K-Phi does not incorporate any Kyriba confidential information. The Declarant's professional knowledge of treasury operations, financial standards, and TMS product design patterns constitutes general industry expertise acquired over a 25-year career, predating the Kyriba engagement.

9. INTELLECTUAL PROPERTY PROTECTION MEASURES

Protection	Status	Reference
EU Trade Mark (EUIPO)	Filed 20 May 2026 — Fast Track	Application 019367882
e-Soleau Deposit (INPI)	In progress	Source code archive
GitHub Repository	Active since 15 Feb 2026	github.com/vinzzzzz2000/lfs-engine
Domain Registration	Active	k-phi.com
Corporate Entity	Active	Vdonomics Consulting Kft (HU)
Clean Room Memorandum	This document	VDO-CR-2026-001

10. DECLARATION

I, Vincent Donnat, acting in my capacity as Owner of Vdonomics Consulting Kft, hereby declare that all statements made in this memorandum are true and accurate to the best of my knowledge and belief. I understand that this document may be relied upon in legal proceedings, investor due diligence, or intellectual property disputes.

Vincent Donnat

Owner, Vdonomics Consulting Kft

Date: 22 May 2026

Place: Budapest, Hungary

CONFIDENTIAL — This document is prepared for the sole use of Vdonomics Consulting Kft and its legal advisors. It may be shared with potential investors, acquirers, or courts of law as needed for IP protection purposes.
